¹ In the absence of a data collection system for the Trinidad Semi-Industrial Fishpot/Line fleet, an estimate for 1997 is used for all years.

² In the absence of total landings for the Tobago commercial fishery, an estimate for 1991 (Mohammed 1994) is used for all years. In 1991 there were a total of 275 registered fishing vessels, all of which were artisanal, compared with a 2006 estimate of 306 vessels of which about nine were semi-industrial and the remainder artisanal (based on informal communication with staff of the Department of Marine Resources and Fisheries of the Tobago House of Assembly (THA)).

³ In the absence of a data collection system for the Recreational fleet, a 1993 annual estimate for the recreational fishery in the Northwest peninsula of Trinidad (Mike 1993) is used for all years.

Note: Landings from foreign fleets that may have operated in Trinidad and Tobago waters are not included.

WATER RESOURCES

TABLE 8.1 CHALLENGES FACING A RELIABLE AND SUSTAINABLE WATER PRODUCTION IN TRINIDAD AND TOBAGO

▪ Old infrastructure and under investment	▪ Poor operation and maintenance
▪ High unaccounted for water losses in the distribution network	▪ Inadequate tariff
▪ Storage capacity	▪ Water pollution from point sources and non point sources
▪ Climate changes (temperature increases, sea level rise, saltwater intrusion, hurricanes, lengthy drought periods)	▪ Increased cost to produce, treat and distribute water
▪ Poor land use	▪ Increased population growth in urban centers
▪ Increased urban development	▪ Public health concerns
▪ Disaster preparedness	▪ Inappropriate technology
▪ Freshwater scarcity	▪ Bush fires,
▪ Degradation of hillsides	▪ Unplanned settlements

TABLE 14.1 LANDFILL STATISTICS

Site	Area (km ²)	Daily Tonnage (metric)	Catchment	Special Feature Notes
Beetham	0.61	873	Chaguaramas in the West, to Curepe in the East and as far South as Chaguanas	No cover material available on site. Site has been earmarked for closure.
Forres Park	0.08	491	Chaguanas in the South, to Mayaro in the East inclusive of areas further South of Chaguanas	Cover material is excavated at the site; site contains a leachate collection system and is the only engineered site.
Guanapo	0.07	266	St Augustine in the East, to Toco in the North-East and includes areas South of Mayaro	Cover material is excavated north of the site. Site has been earmarked for closure. The Guanapo Landfill has the potential to have a direct impact (negative) on the underlying aquifer and all surface water downstream of the site.

Notes:

1. Figures shown are estimates.
2. There is overlapping in the type of waste that is delivered in all three (3) sites

Topographical maps of the Beetham, Guanapo and Forres Park landfills are shown at Appendices D1, D2 and D3 respectively. Aerial photographs of these landfills are shown at appendices E1, E2 and E3.

TABLE 14.6 THE VARIOUS SECTORS AND WASTE TYPES SURVEYED

Sector	Description of Compostable Waste Type
Residential, Commercial & Institutional (residences, businesses, schools)	This includes the broad spectrum from yard trimmings, shredded or otherwise, (e.g. grass clippings, leaves and weeds, and shrub) to food scraps (e.g. vegetable and fruit peels/rinds and scraps, egg and nut shells, ground coffee and tea bags) and selected other organics such as soiled paper napkins and cardboard. Compostable waste from this sector should also include larger items such as tree prunings etc. routinely collected by the “cuttings” truck sanctioned through the Regional Corporations.
Food Industry	This includes “pre-consumer” (raw vegetative food items) material from supermarkets, other markets, green grocers, restaurants and food manufacturers. This would largely comprise vegetative food items in various states of spoilage.
Agricultural	This includes stalks, stems and other post-harvest agricultural crop residues. This should also include soiled paper products and material used as fodder for livestock once free from any meat content.
Wood & Furniture	This includes carbonaceous material such as sawdust and wood chips.
CEPEP ³ , URP ⁴ , Self Help, Forestry Division, MoWT ⁵	This includes compostable wastes of the types alluded to in most of the above sectors.
